

The Ogre Enviroclean FA Gun Solvent

Enviroclean FA is a general purpose, biodegradable cleaner for firearms. The product works by rapidly loosening and dissolving gunpowder fouling. The loosened or dissolved fouling can then be easily wiped away using conventionally available firearm cleaning patches or a clean, dry cloth.

“The fact that the odor has been almost eliminated is great,” said Jerry Ross, manager of the Holiday Shopping Center, Montello, Wis. “This product is all it says it is and does. Its as effective as any solvent I’ve used but without the smell.
