**ENVIROCLEAN FA HITS THE MARK**

**MILWAUKEE, WI**— Since its release, OGRE Manufacturing's innovative one-step cleaner – Enviroclean FA – has quickly made an impact on the firearms cleaning world. Today's environmental concerns have brought big changes to gun cleaning because many of the chemicals that were successful in cleaning guns in the past are now known to be harmful to the user or to the environment. Enviroclean FA is safe for the environment, safer for the shooter to use, and is virtually odor free. This allows you to clean your gun anywhere, anytime, without the noxious fumes that most cleaners leave behind.

Enviroclean FA is biodegradable and is considered non hazardous under DOT regulations. With a flash point greater than 200°F (93°C), Enviroclean FA is safer to use than conventional firearm cleaning solvents such as kerosene, acetone, xylene, toluene and isopropyl alcohol.

Most importantly, Enviroclean FA takes the work out of gun cleaning. Enviroclean FA rapidly cuts through firearm fouling and residue left from other cleaners without all the harsh scrubbing. Plus, Enviroclean FA contains biodegradable oil that not only helps clean firearm parts, but also lubricates! This composition makes Enviroclean FA slow to evaporate so the solvent stays on the firearm working to dissolve and loosen fouling, making removal much easier than conventional cleaners.

The process is simple: Put Enviroclean FA on the firearm, Wait and Remove. In 10 minutes or less you are ready to wipe your firearm clean. The biodegradable product is also non-corrosive to skin and is ammonia-free.

"I believe that I have been successful in developing a cleaning product that is both user friendly and safe for the environment," said John Thompson, chemist and inventor of Enviroclean FA. "As an avid shooter and hunter, gun cleaning was never a favorite chore. Wisconsin winters can be brutal and cleaning my firearms in the house was never an option before Enviroclean FA!"

Visit us at Booth 189 at the SHOT Show, January 11 - 14, 2007, in Orlando, FL.

OGRE Manufacturing, LLC is headquartered in Milwaukee, Wisconsin. Enviroclean FA is currently used by law enforcement and can be obtained in larger sizes/quantities. Mfg. Dealer inquiries are welcome. More information can be obtained by calling 414-475-9339 or email [ogremfg@aol.com](mailto:ogremfg@aol.com). Visit our web site at <http://www.ogremfg.com>.
